SUMMARY

Results-driven Chief Technology Officer, Machine Learning Engineer, and full-stack technology leader with 19+ years architecting end-to-end software solutions and AI-powered platforms. Holds a Master's degree in Artificial Intelligence (Machine & Deep Learning) with deep expertise spanning backend, frontend, and database design through cloud infrastructure, DevOps, and advanced AI/ML integration. Proven record delivering scalable, production-ready platforms leveraging deep learning, NLP, RAG pipelines, LLM agents, and vector databases, including a semantic search system that improved retrieval accuracy from 26% to 98%. Track record founding and leading engineering organizations, lecturing on applied AI at the university level, and aligning technology strategy with business growth across e-commerce, trade, workspace, and SaaS domains.

CORE SKILLS

AI & Machine Learning	Deep Learning (CNNs, RNNs), NLP, Semantic Search & Vector Indexing, RAG Pipelines, LLM Agents & Integration, Computer Vision, MLOps, Workflow & Process Automation, Data Analytics & Business Intelligence
Languages	Python, JavaScript / TypeScript, R (working knowledge of C#, Java, PHP)
Frameworks & Tools	TensorFlow, PyTorch, Keras, scikit-learn, spaCy, Django, FastAPI, Flask, React, Next.js, Hadoop, Apache Spark, Docker, Git
Cloud & Infrastructure	AWS, Google Cloud Platform, Microsoft Azure, Linux/Ubuntu Server, Microsoft Server & Active Directory, IoT (Raspberry Pi, Arduino)
Databases	Vector DBs (Weaviate, FAISS, Pinecone, PGVector), PostgreSQL, MySQL, MongoDB, Redis, Neo4j
Leadership	IT & Product Strategy, System Architecture, Agile/Scrum, Cross-Functional & Global Team Leadership, Technical Delivery Management

PROFESSIONAL EXPERIENCE

Systems Architect · KTS Export	Jun 2026 – Present
- Architected and built an AI-driven platform automating the full export lifecycle: inventory acquisition, container verification, logistics tracking, sales, and profitability analysis for trade between Korean suppliers and global buyers. - Built end-to-end inventory traceability (serial- and model-level tracking) and automated export documentation, compliance workflows, and real-time BI/financial dashboards.	
University Lecturer & AI Systems Engineer · Storm Tower, AI Consulting	Feb 2026 – Present
- Lecture on applied AI at universities; advise organizations on converting AI into measurable business impact. - Supported seven companies in adopting AI technologies, building custom applications, automating workflows, and deploying production-grade LLM/RAG knowledge platforms, semantic search, and intelligent routing systems.	
Chief Technology Officer · G Man Auto Parts Corp	2025
<i>Deep Tech Investment Integration, South Korea</i>	
- Led technology strategy and deep-tech integration, directing ML, deep learning, RAG, and LLM-agent initiatives and vector-DB-powered search for e-commerce and enterprise clients. - Provided technical leadership across engineering teams and guided long-term IT strategy and cloud infrastructure development.	
Chief Technology Officer (prev. Data Scientist / Senior Developer) · Office Harbour	2024 – Present
- Architected and built the platform end-to-end (backend, frontend, ML systems, and AI-driven RAG integrations) on self-sufficient, cloud-native infrastructure with semantic search, vector indexing, and Cloudflare edge caching, achieving 99% uptime and near-instant global response times. - Promoted to CTO; now directs product strategy and engineering execution for an AI-powered platform automating workspace discovery, lead qualification, provider matching, and customer engagement. - Designed intelligent recommendation systems and automation pipelines for office sourcing, onboarding, quoting, and customer communications, backed by BI reporting.	
Data Scientist (Consultant) / Senior Developer · Silver Cloud B.V.	2022 – 2025
- Led ML solution development focused on NLP (TensorFlow, PyTorch, spaCy); integrated LLMs to expand product capabilities and improve model accuracy. - Architected and managed AWS/GCP cloud infrastructure for high-availability AI services, and advised on backend/frontend architecture to boost development efficiency.	

Co-Founder · SableApps (Pty) Ltd	2017 – 2022
- Founded and led SableApps, delivering 8+ major Python/Django applications across healthcare, education, and finance. - Built a Korean Government-funded adaptive testing platform for hospital nurses, a school management system (attendance, finance, class management), and a stock-market trading credibility platform for a Dutch client.	
Developer Team Leader · CornWare (Pty) Ltd	2018 – 2019
- Led a four-developer team building a hospital staff-management platform with an AI-oriented smart testing system, on Azure Cloud, Django, and Microsoft SQL Server. - Architected real-time tracking and quality-control workflows across departments for multi-business deployment.	
International Team Leader · Sunae	2014 – 2017
- Led a globally distributed team across the U.S., Australia, China, Brazil, South Africa, Russia, and Japan. - Directed IT infrastructure and operations across international centers, designing enterprise systems supporting cross-border collaboration and business continuity.	
IT Manager → Director · Switch Air (Pty) Ltd	2007 – 2011
- Promoted from IT and corporate sales to Director; secured and managed corporate contracts with clients including Anglo American, BTX, Longmin, and Amplats Platinum Mines. - Designed, built, and managed enterprise server rooms (data centers) and the company's Microsoft Server / Active Directory infrastructure for 47 employees.

EDUCATION

M.S., Artificial Intelligence (Machine / Deep Learning) · Woosong University	2024
GPA 4.2 / 4.5	
B.A., Global Media & Programming · Sol International University	2018
GPA 4.3	
Certificate in Korean Culture · Hannam University	2014
Certificate in Korean Language · Jeju National University	2012
High School Matric · Michael Mount Waldorf School (South Africa)	2007

CERTIFICATIONS & COURSEWORK

AI & ML	AWS SageMaker Practical · Machine Learning · Deep Learning for Image Segmentation (TensorFlow 2) · NLP with Python · Advanced Algorithms
Data & Big Data	Big Data & Hadoop · Hands-On Hadoop · The Ultimate Hands-On Hadoop
Software & Web	Modern Python Bootcamp · Deep Python Studies · JavaScript (Basics to Advanced) · REST API with Python · Python API for Trading · Mastering AJAX · Complete React Developer (Redux, Hooks, GraphQL) · Mastering Django Web Development · Python Django Bootcamp · SEO Compliance
Databases	Learn SQL Using PostgreSQL: Zero to Hero · PostgreSQL Complete
IoT & Emerging Tech	IoT with Arduino & Python · Raspberry Pi Tips, Tricks & Hacks · Introduction to VR with Unity
